

By the middle of the century, the world will use twice as much energy as we do today, much of it in places that have never had access to power before.

Therefore it is estimated, that coal-fired power generation will significantly increase climate change.

The present tools to prevent climate change are not efficient enough.

The reason for the climate change is the improvement of combustion, based on James Watt's famous invention.

The most vital task of human kind requires the second generation energy paradox. And as soon as possible. Hopefully we are not too late.

**The first-ever, breakthrough and operational  
EnergyParadox Concept  
generates power powered by  
power of gravity instead of energy.  
It will shake the status quo of nations.  
Without human nor environmental sacrifices.**

#### EnergyParadox

- Best Available Technology BAT
  - The only one
- Non-renewable
- Non-energy
- Perpetual
- Constantly
- Power
  - cleanest
  - cheapest
  - secure
  - dispatchable
  - storage

A perpetual motion machine is a hypothetical machine that can do work indefinitely without an *energy source*.

### Fundamental gravity

- *Force instead of energy*
- *Where you take gravity from*
- Cannot be converted to energy
  - Medium is needed
- Cannot be transferred
- Cannot be stored
- In EnergyParadox gravity overcomes gravity
- None knows what gravity is
- The main issue - it affects

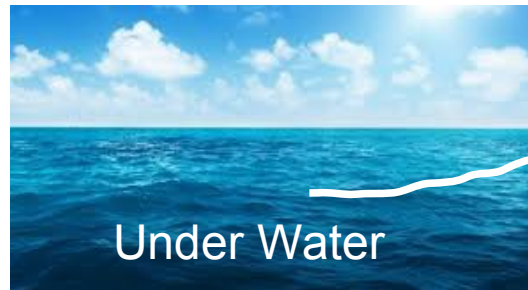

***If facts don't fit the theory, change the theory.***

## EnergyParadox Breakthrough for Climate Change

- Only one wire
- NO input/output
- NO moving part (core process)

Self-supposing  
construction

Underground  
mines

Under Water

### Benefits

- Multi-secure
  - Military
  - Datacenters
  - Hospitals
- Space
- Taxation
